

NextWindow Adds New All-in-One PC to Portfolio

NEC joins Dell, Hewlett-Packard, Medion and Sony among leading PC makers using NextWindow touch screens

Pleasanton, CA – October 29, 2009 – NextWindow, a provider of optical touch screens for desktop PCs and monitors, today announced a new addition to the list of all-in-one (AIO) computers powered by NextWindow. Japanese electronics manufacturer NEC has launched the ValueStar W, an AIO computer with a 21.5” touch screen. NEC’s first multi-touch AIO computer, the ValueStar W currently is available only in Japan.

The AIO computer category is a segment of the desktop PC market. Two weeks ago, Hewlett-Packard introduced the TouchSmart 300, 600 and dx9000, HP’s third generation of AIO computers. And earlier this month Sony and German PC maker Medion each launched a new AIO desktop PC. NextWindow touch screens are used in all of these products, as well as the Dell Studio One 19 AIO.

“All-in-one PCs have become attractive consumer appliances, and users appreciate the convenience factor: touching a computer screen to access content frequently is faster and more practical than sitting down to use a mouse and keyboard,” said Al Monroe, CEO at NextWindow. The launch of Windows 7 combined with the plethora of new AIO desktop PCs from leading manufacturers was an important stimulus for consumers, whom we expect will gravitate to AIOs at an increasingly fast pace in the coming months and years.”

About NextWindow

NextWindow is a leader in touch-screen technology and a major manufacturer of optical multi-touch displays for OEMs, ODMs and resellers. With highly accurate, cost-effective solutions designed for personal and business use, NextWindow provides the hardware necessary to bring touch-screen technology to life—giving software designers the freedom to create exciting and intuitive applications. Founded in 2000, NextWindow is privately held with offices in New Zealand, Taiwan, California and Singapore, with manufacturing facilities throughout Asia. More information about NextWindow is available at www.nextwindow.com.
