

European Market Prepares for New All-in-One PC Using NextWindow Touch Screens

Recently launched Medion X9613 with 24" multi-touch screen soon to be available in Germany

Pleasanton, CA – October 8, 2009 – NextWindow, the market and technology leader in optical touch screens for desktop PCs and large-format displays, today announced that another PC maker will soon begin selling an all-in-one computer with NextWindow touch screens. Global PC and consumer electronics developer Medion recently announced plans to offer a multi touch-enabled system with a 24" screen. Branded the Medion X9613, the all-in-one PC will be available initially in Germany.

All-in-one computers represent a growing segment of the larger PC market. These products combine all hardware and software inside a computer's monitor, and they mainly are desktop systems though some, such as the Medion X9613, can be mounted to a wall. US-based electronics giants Dell and Hewlett-Packard were among the first companies to offer a PC version of the all-in-one computer. Both companies are using optical touch screens from NextWindow in their all-in-ones.

"NextWindow is having success in the all-in-one PC market because optical touch screen technology, which NextWindow develops, offers the lowest cost and best performance among available technologies," said Al Monro, NextWindow CEO. "We're pleased to see the Medion X9613 come on to the market and we look forward to welcoming several other touch PCs around the time of the launch of Windows 7, with which NextWindow touch screens are fully compatible."

About NextWindow

NextWindow is a leader in touch-screen technology and a major manufacturer of optical multi-touch displays for OEMs, ODMs and resellers. With highly accurate, cost-effective solutions designed for personal and business use, NextWindow provides the hardware necessary to bring touch-screen technology to life—giving software designers the freedom to create exciting and intuitive applications. Founded in 2000, NextWindow is privately held with offices in New Zealand, Taiwan, California and Singapore, with manufacturing facilities throughout Asia. More information about NextWindow is available at www.nextwindow.com.
